About Nebraska Women in STEM

The mission of Nebraska Women in STEM is to provide opportunities for Nebraska's professional women in science, technology, engineering, and mathematics (STEM) to develop professionally, make connections, and promote policies that increase the number of women in STEM.

To do this, we are working to:

- Address industry workforce shortages and diversity challenges by providing awareness and education and advocating for women in STEM
- Create more career and leadership opportunities for women in STEM by providing professional development opportunities
- Connect professional women in STEM through networking and mentorship opportunities

The Nebraska Women in STEM conference is part of our commitment to reduce barriers and provide professional development opportunities for women in STEM careers across Nebraska. The day-long event will take place on April 4, 2024, at the Embassy Suites by Hilton Omaha La Vista Hotel & Conference Center in La Vista, Nebraska.

**Nebraska Women in STEM is a partnership between
Bio Nebraska and Nebraska Cures**

Why Attend?

Attendees of the Nebraska Women in STEM Conference will have the opportunity to develop their personal and professional identity, build networks of support to help them achieve their goals, and have a great time while doing it!

NETWORK

Build your network! Whether it's during the conference's breakout sessions or the various networking opportunities offered throughout the day, make new connections and find potential mentors and collaborators.

GAIN KNOWLEDGE

The conference theme "Strive, Thrive, Empower, Mentor" lends itself to a number of different presentation topics and styles to support attendees in their personal and professional development.

BE INSPIRED

Attending the Nebraska Women in STEM Conference is a great way for attendees to discover new ideas, exciting projects, and meaningful partnerships to inspire their journey.

NEW OPPORTUNITIES

Whether you're looking for something new or wanting to learn more about a topic of interest, seek new opportunities available to professional women in STEM.
